1 Prepare the battery pack

Insert the battery pack.

Push the back panel of the battery pack gently until it clicks into place.

To wall outlet (wall socket)

Battery charger

Power cord (mains lead)

Connect the power cord (mains lead)

Light on: Charging

Light off: Complete (Practical charge)

If you continue charging the battery pack for about one more hour (until it is fully charged), the charge will last slightly longer.

• Connect the battery charger to a readily accessible wall outlet (wall socket) directly.
• Even if the CHARGE lamp is lit, the battery charger is not disconnected from the A/C power source (main) even if it is connected to the wall outlet (wall socket). If the supply should be interrupted while using the battery charger, immediately disconnect the plug from the wall outlet (wall socket).
• When charging is finished, disconnect the power cord (mains lead) from the wall outlet (wall socket), and remove the battery pack from the battery charger.
