Game

Try out a game to test your skill with the Jog Dial. Press the Jog Dial forward or  to suspend (pause) and use the Endkey to quit the game.

Sport fishing

Rotate the Jog Dial to adjust the length of the fishing line. Press the Jog Dial after the fish has taken the bait to get a hit with careful timing. After you get a hit keep an eye on the reel and use the Jog Dial to “land that fish!”

Clay Shooting

Rotate the Jog Dial to determine your target, then press the Jog Dial to fire the rifle. The more plates you knock down the higher your score.

Press the Jog Dial backward in the standby mode to access the Internet and E-mail or to open the Games Menu. It is necessary to register with a service provider to use this telephone as a browser or for E-mail. In some cases registration has already been completed. Check with your service provider in advance to confirm whether this phone has access to service. Also, check with your service provider when using this phone overseas.

Browser

You can visit various information sites on the Mobile Internet Service and Intranet information on your company. It is possible to access a variety of information such as news or weather reports from around the world, as well as regular sites on the Internet.

Note

- A security code may be necessary when using your browser or sending E-mail. Use the code that is set as your personal lock. For details see “Personal lock” page 65 in the User Guide.
- Internet access is limited to the sites that are configured in HTML or WML. WML’s site is accessed using Wap (the Wireless Application Protocol created for Internet service through mobile phones).
- You can not make phone calls while accessing the Internet.

Launching your browser

With the Flip cover open in the standby mode, press the Jog Dial backward then select Browser and the following menu is displayed. Rotate the Jog Dial and then press it to select an item from the menu. Press the Jog Dial forward to return to the previous screen.
