▶ Getting started

Preparing a power source

Using the rechargeable battery

Charge the supplied rechargeable battery before using it for the Assemble the battery charging stand as shown in Fig. \blacksquare - \blacksquare .

Insert the supplied rechargeable battery NH-14WM into the rechargeable battery compartment with correct polarity (see

2 Connect the supplied AC power adaptor to the battery charging stand and plug the AC power adaptor into an electrical outlet (see Fig. A-©).

3 Place the player on the battery charging stand. The CHARGE lamp will light up. Full charging takes about 6 hours. The CHARGE lamp will go off when charging is complete

• Do not operate the player when you place it on the battery charging stand or during charging. If you do so, it may cause the player to malfunction or prevent the battery from charging. • The supplied battery charging stand is for use with the NH-14WM only. It cannot be used with the NC-6WM.

Using a dry battery (see Fig. A-D)

Attach the supplied battery case to the player, and then insert one LR6 (size AA) battery with correct polarity. Be sure to insert the minus (Θ) terminal of the battery first.

You can check the battery condition with the battery indication

on the remote control and the 3 Color Info-LED on the player while using the player.

► Various ways of playback

Selecting the play mode (see Fig. D)

You can select from various play modes using the PLAYMODE

and RPT/ENT on the remote control. 1 Press PLAYMODE repeatedly to select one of the four play

modes, as follows:	
Play mode display	Playback status
(none) (normal play)	All the tracks are played once.
"1" (single play)	A single track is played once.
" SHUF " (shuffle play)	All the tracks are played in rand order.
" PGM " (program play)	Tracks are played in the order the you specified.

Listening to tracks in a desired sequence (Program Play)

- 1 During playback, press PLAYMODE on the remote control repeatedly until "PGM" flashes in the display.
- **2** Turn the control on the remote control repeatedly to select a track number (see Fig. D-B).
- **3** Press RPT/ENT on the remote control. The track is entered.

Repeat play You can use this function to repeat playback in normal play, single play, shuffle play, or program play mode.

1 Press RPT/ENT on the remote control during playback. "←" appears in the display.

Using the group function (See Fig. ■)

The MZ-E501 can be used with a disc which has group settings. The group function is useful for playing a great number of tracks, or tracks that have been recorded in MDLP (LP2/LP4)

What is a disc with group settings?

This is a disc with settings that organize tracks into groups, and which allow those groups to be selected. The MZ-E501 does not support the recording of group settings. If your recorder has a function for editing disc names, you can use it to register groups.

Listening to tracks in a specific group (Group Mode Playback) (see Fig. **E**-A)

- Insert a disc which has group settings into the player, and then play the disc.
- **2** Press DISPLAY on the remote control for 2 seconds or more.
- **3** Turn the control on the remote control repeatedly until "GROUP" flashes, and then press ■ on the remote control.
- **4** Turn the control on the remote control repeatedly until
- "GROUP ON" flashes, and then press on the remote control. (Or on the player, press GROUP for 2 seconds or

To turn off group mode

Select "GROUP OFF" and press ■ in step 4. (Or on the player, hold down GROUP for 2 seconds or more.) The 3 Color Info-LED lights up red and group mode turns off.

- Group mode is cancelled when the lid is opened. • If you try to turn on group mode with a track that does not belong to any group, "Invalid GP" will flash in the display. If this happens, change to group skip mode and select a track that belongs to a group (see "Selecting and playing desired groups"). Then repeat step 2.
- If "NO GROUP" appears in the display on the remote control in step 4, it means that you are using a disc that has no group settings. Insert a disc with group settings and repeat step 1. • If group mode is off and you try to play a disc that has group settings, the following the text string may appear in the display.

① Disc name "Favorites" Group name "Rock": registered tracks 1 to 5 3 Group name "Pops": registered tracks 6 to 9

Selecting and playing desired groups (Group Skip Function)

the player enters group skip mode.

With a disc which has group settings, you can skip from the currently playing group to any other group on the MD.

- Insert a disc which has group settings into the player and play the disc.
- **2** Hold down PLAYMODE on the remote control until "---" flashes in the display. (Or on the player, press GROUP.) The 3 Color Info-LED on the player lights up orange, and
- While the LED lights up orange (for 5 seconds), turn the control on the remote control repeatedly until the name or number of the desired group appears (see Fig. **E**-**B**). During playback in group mode, playback of the selected group starts with the first track in the group and stops with the last track in the group.
- During normal playback, playback of the selected group starts with the first track in the group and stops with the last track on the disc.

The group skip function can be used at any time during playback, regardless of whether the player is in group mode on or not.

• If no operation is performed within 5 seconds after step 2, group skip mode is cancelled. To continue the procedure, start from step 1 again. Group skip mode cannot be used with a disc that has no group

Polarity of the plug

 Position the player within easy reach of the electrical outlet. Should vou notice an abnormality in the player, disconnect the AC power adaptor from the electrical outlet immediately

- The supplied battery charging stand can be used only with the MZ-E501. It cannot be used to charge all other models. • Do not use the MZ-E501 to charge any other battery besides the one
- Though the battery charging stand and the battery may become hot during the charging procedure, this poses no danger
- Because of the battery's character, the capacity of the battery may be smaller than normal when it is used for the first time or after a long period of disuse. In this case, charge and discharge the battery several
- times. The normal battery life will be restored • If the capacity of the rechargeable battery becomes half the normal life, replace it with a new one.
- As soon as charging is complete, remove the player from the battery charging stand and disconnect the battery charging stand from the electrical outlet. Leaving it connected may result in reduced battery
- The CHARGE lamp will go off about 6 hours of after you place the player on the battery charging stand. If you remove the player from he battery charging stand for 3 seconds or more while it is charging, the CHARGE lamp will go off. It will then take about 6 hours for the lamp to go off from the time you next place the player on the battery

On Handling

- Do not drop or bump the player. This may cause the player to malfunction.
- Do not pull on the remote control or headphones/earphones cords. • Do not place the player in the following places: — An extremely hot place (over 60°C (140°F))
- A place exposed to direct sunlight or near a heater — In a car with the windows rolled up (especially in the summer) — In a damp place such as a bathroom
- Near a source of electromagnetic fields such as a magnet, speaker, or

On heat build-up Heat may build up in the player if it is used for an extended period

of time. This, however, is not a malfunction. On mechanical noise

The player gives out mechanical noise while operating, which is caused by the power-saving system of the player. This is not a

On installation

- Never use the player where it will be subjected to extremes of light, temperature, moisture or vibration.
- Never wrap the player in anything when it is being used with the AC power adaptor. Heat build-up in the player may cause malfunction or

On the remote control The supplied remote control is designed for use with the MZ-E501 only. Note also that the player cannot be controlled by remote controls for other models

On the MiniDisc cartridge

- Do not touch the internal disc directly. Forcing the shutter open may damage the internal disc.
- When transporting a minidisc, keep it in its case. Do not place the cartridge where it will be subjected to light,
- temperature, moisture or dust. • Do not affix the lable outside of the specified area on the MD. Make sure the lable is placed within the recessed space on the disc.

On the headphones/earphones

- · Do not use headphones/earphones while driving, cycling, or operating any motorized vehicle. It may create a traffic hazard and is illegal in nany areas. It can also be potentially dangerous to play your player at high volume while walking, especially at pedestrian crossings. You should exercise extreme caution or discontinue use in potentially
- hazardous situations. • If you experience an allergic reaction to the supplied headphones earphones, stop using them at once and consult a doctor or a Sony

Preventing hearing damage

Avoid using headphones/earphones at high volume. Hearing experts advise against continuous, loud and extended play. If you experience a ringing in your ears, reduce the volume or discontinue

Keep the volume at a moderate level. This will allow you to hear

outside sounds and to be considerate of the people around you.

On the battery case

The supplied battery case is designed for use with the MZ-E501 only.

- After wiping the player casing with a soft cloth slightly moistened with water, wipe it again with a dry cloth. Do not use any type of abrasive pad, scouring powder or solvent such as alcohol or benzene as it may mar the finish of the casing.
 - Wipe the disc cartridge with a dry cloth to remove dirt. • Dust on the lens may prevent the unit from operating properly. Be
- sure to close the disc compartment lid after inserting or ejecting an
- A dirty plug may cause noise or intermittent breaks in the sound during playback. To maintain good sound quality, use a soft cloth to clean the plugs of the headphones/earphones and remote control.

On maintenance (see Fig. K) If you have any questions or problems concerning your player, please consult your nearest Sony dealer. (If a trouble occurred when the disc was in the player, we recommend that the disc be left in the

player when you consult your Sony dealer so that the cause of
