

SONY[®]

Sistem teatro shtëpiak

Manual Përdorimi

PARALAJMËRIM

Për të ulur rrezikun nga zjarri, mos i mbyllni hapjet për ventilim të aparatit me gazeta, mbulesa, perde etj.

Mos vendosni burime të ngrohtësisë (siç është qiri me flakë).

Për të ulur rrezikun nga zjarri ose shoku elektrik, mos e ekspozoni aparatin në pika ose spërkatje dhe mos vendosni gjëra të mbushura me ujë siç është vaze mbi aparatin.

Mos e vendosni aparatin në hapësirë të mbyllur siç është raft i librave ose vend i integruar në mur.

Mos ekspozoni bateritë ose aparatin në ngrohtësi të madhe siç janë dritë e diellit, zjarr ose diçka të ngjashme.

Për të parandaluar dëmtimin, ky aparat duhet të vendoset në mënyrë të sigurt në kabinetin apo bashkangjitur dysheme / mur në përputhje me udhëzimet e instalimit.

Përdoreni vetëm brenda shtëpisë.

Mbi burimet e rrymës

- Njësia nuk është fikur tërësisht nga rryma nëse nuk keni nxjerrë nga prizë e rrymës, madje edhe njësia është shkyçur.e
- Meqë kyçësja kryesore përdoret për shkyçjen e njësisë nga rryma kryesore, lidhjeni aparatin në një prizë muri të afërt. Nëse vëreni diçka të çuditshme në lidhje me punën e aparatit, largojeni njësinë nga prizë e rrymës menjëherë.

Kordonë të rekomanduara

Kordonë të mbrojtur mirë dhe tokëzuar dhe konektorë duhet të përdoren për lidhjen e kompjuterit kryesore dhe/ose periferitë

Për produktin me CE shënuar

Vlefshmëria e CE është kufizuar vetëm në ato vende ku ajo është zbatuar në mënyrë të ligjshme, kryesisht në EEA (European ekonomike Area).

Për konsumatorët në Evropë

Shkatërrimi i baterive të baterive dhe pajisjeve elektrike dhe elektronike (të aplikueshme në Bashkimin Evropian dhe në vendet e tjera evropiane me sisteme të ndara të grumbullimit)

Ky simbol i produktit, baterisë ose paketimit tregon se produkti dhe bateria nuk duhet të trajtohen si mbeturina shtëpiake. Për disa bateri ky simbol mund të përdoret në kombinim me simbolin kimik. Shtohen simbolet kimike për merkurin (Hg) ose plumb (Pb) nëse bateria përmban më shumë se 0,0005% merkuri ose 0,004% plumb. Duke siguruar që këto produkte dhe bateritë të eliminohen në mënyrë korrekte, ju do të ndihmoni në parandalimin e pasojave të mundshme negative për mjedisin dhe shëndetin e njeriut të cilat mund të shkaktohen nga trajtimi i papërshtatshëm i mbeturinave. Riciklimi i materialeve do të ndihmojë në ruajtjen e burimeve natyrore.

Në rast të produkteve që për arsye sigurie, performansi ose integriteti të të dhënave kërkojnë lidhje të përhershme me një bateri të inkomporuar, kjo bateri duhet të zëvendësohet vetëm nga stafi i kualifikuar i shërbimit. Për të siguruar që bateria dhe pajisjet elektrike dhe elektronike të trajtohen si duhet, dorëzoni këto produkte në fund të jetës në pikën e mbledhjes së aplikueshme për riciklimin e pajisjeve elektrike dhe elektronike. Për të gjitha bateritë e tjera, ju lutemi shikoni seksionin se si të hiqni baterinë nga produkti në mënyrë të sigurt. Dorëzoni baterinë në pikën e mbledhjes së aplikueshme për riciklimin e baterive të mbeturinave. Për informacione më të hollësishme rreth riciklimit të këtij produkti ose baterie, ju lutemi kontaktoni Zyrën tuaj Civile lokale, shërbimin tuaj të deponimit të mbeturinave shtëpiake ose dyqanin ku keni blerë produktin ose baterinë.

Shënime për konsumatorët: informatat vijuese vlejné vetëm për pajisjet e shitura në shtetet që zbatojné direktivat e BE-së.

Ky produkt është prodhuar nga ose në emër të Sony Corporation, 1-7-1 Konan Minato-ku Tokio, 108-0075 Japoni. Kërkesat në lidhje me përputhjen e produktit bazuar në legjislacionin e Bashkimit Evropian do t'i drejtohen përfaqësuesit të autorizuar, Sony Belgium, Sony Europa Limited, Da Vincilaan 7-D1, 1935 Zaventem, Belgjikë. Për çdo çështje shërbimi ose garancie, ju lutemi referojuni adresave të dhëna në dokumentet e veçanta të shërbimit ose të garancisë.

Me këtë, Sony Corp., deklaron që kjo pajisje është në përputhje të plotë me kërkesat themelore dhe dispozitat tjera të domosdoshme të Direktivës 1999/5/EC.

Për detaje, shikoni URL më poshtë:
<http://www.compliance.sony.de/>

Kjo Sistem teatro shtëpiak rojektuar për të luajtur nga pajisjet e lidhura, streaming muzikë nga smartphones ose pajisje BLUETOOTH NFC-compatible.

Kjo pajisje është testuar dhe konstatuar që përputhet me kufizimet e caktuar nga EMC rregulloren për përdorimin e kordonit lidhës më të shkurtë se 3 metra.

Për klientët në Australi dhe Indi

Shkatërrimi i pajisjeve të vjetra elektrike dhe elektronike (që aplikohet në Bashkimin Evropian dhe në vendet e tjera evropiane me sisteme të ndara të grumbullimit)

Shtypni për të zgjedhur skedarin ose skedarin e mëparshëm / të ardhshëm.

Mbani të shtypur për të kërkuar prapa ose përpara.

* Butonat ◀ + dhe ▶▶ kanë një pikë prekëse. Përdoreni atë si një udhëzues gjatë përdorimit.

Instalimi i sistemit

Lidhjet themelore dhe përgatitja

Referojuni Udhëzuesit të Fillimit (dokument i veçantë).

Montimi i altoparlantit dhe altoparlantëve rrethues në një mur

Ju mund ta montoni kryetarin e barit dhe altoparlantët rrethues në një mur.

Shënim

- Përgatitni vidat (jo të furnizuara) që janë të përshtatshme për materialin dhe forcën e murit. Si një mur i suvës është veçanërisht i brishtë, lidhni vida me siguri në rreze të murit. Instaloni altoparlantët në një mur vertikal dhe të sheshtë, ku zbatohet përforcimi.
- Sigurohuni që nënkontratimin e instalimit të tregtarëve Sony ose kontraktorëve të licencuar dhe t'i kushtoni vëmendje të veçantë sigurisë gjatë instalimit.
- Sony nuk mban përgjegjësi për aksidentet ose dëmtimet e shkaktuara nga instalimi i pahijshëm, forca e pamjaftueshme e murit, instalimi i pahijshëm i vidave apo fatkeqësia natyrore etj.

- 1 Përgatitni vidat (jo të furnizuara) që janë të përshtatshme për vrimat në pjesën e pasme të altoparantit ose altoparantëve rrethues.**

Hole në pjesën e pasme të altoparantëve

- 2 Fikni vidat në mur.**

Vidhosja duhet të shtrihet si ilustrim.

Për Kryetarin e Bareve

Për altoparantët rrethues

- 3 Varni altoparantin e varrit ose altoparantët rrethues në vida.**
Drejtoni vrimat në pjesën e pasme të altoparantëve me vida.

Për Kryetarin e Bareve

Vëreni kryetarin e bareve në dy vida.

Për altoparantët rrethues

Vareni altoparantin rrethues në dy vida.

TV INPUT TV BT USB

Listening to sound from the connected devices

Press INPUT repeatedly.

When you press INPUT once, the current device appears in the front panel display. Each time you press INPUT, the device changes cyclically as follows.

"TV" → "ANALOG" → "BT" → "USB"

"TV"

- TV that is connected to the TV IN (OPTICAL) jack
- TV compatible with the Audio Return Channel (ARC) function that is connected to the HDMI OUT (ARC) jack

"ANALOG"

Device (Digital media player, etc.) that is connected to the ANALOG IN jack

"BT"

BLUETOOTH device that supports A2DP (page 15)

"USB"

USB device that is connected to the  (USB) port (page 13)

Listening to music from a USB device

Shën

- To view the USB content list on the TV screen, make sure you connect the system to the TV using HDMI cable.
- Change the input of the TV to the input which the Subwoofer is connected.

Sound Adjustment

Enjoying sound effects

You can easily enjoy pre-programmed sound effects that are tailored to different kinds of sound sources.

Selecting the sound field (SOUND FIELD)

Press **SOUND FIELD** repeatedly until the sound field you want appears in the front panel display.

"CLEARAUDIO+"

You can enjoy the sound with Sony-recommended sound field. Sound field is automatically optimized according to playback content and function.

"MOVIE"

Sound effects are optimized for movies. This mode replicates the density and rich expanse of sound.

"MUSIC"

Sound effects are optimized for music.

"SPORTS"

Commentary is clear, cheers are heard as surround-sound, and sounds are realistic.

"GAME"

Sounds are powerful and realistic, suitable for game play.

"STANDARD"

Sound that corresponds to every source.

Këshillë

You can also press CLEARAUDIO+ to select "CLEARAUDIO+".

Using the Night Mode function (NIGHT)

This function is useful when watching movies late at night. You will be able to hear the dialog clearly even at a low volume level.

Press **NIGHT** to select "N.ON".

To deactivate the Night Mode function, press **NIGHT** to select "N.OFF".

Using the Clear Voice function (VOICE)

This function helps make dialogs clearer.

Press **VOICE** repeatedly.

- "UP OFF": The Clear Voice function is turned off.
- "UP 1": Speech is enhanced.
- "UP 2": Speech is enhanced to ease the elderly to listen to it.

Adjusting the Subwoofer volume

The Subwoofer is designed for playback of bass or low frequency sound.

Press **SW** \triangleleft +/- to adjust the Subwoofer volume.

Shëni

When the input source does not contain much of bass sound, such as in TV programs, the sound from the Subwoofer may be difficult to hear.

BLUETOOTH Functions

Listening to music from a BLUETOOTH device

Pairing this system with a BLUETOOTH device

Pairing is an operation where BLUETOOTH devices register with each other beforehand. Once a pairing operation is performed, it does not need to be performed again.

If your device is an NFC-compatible mobile device, the manual pairing procedure is not necessary. (see "Connecting to a mobile device by One-touch function (NFC)" page 16)

- 1 Place the BLUETOOTH device within 1 meter from the Subwoofer.**
- 2 Touch  PAIRING on the Subwoofer.**
The system enters the pairing mode. The BLUETOOTH indicator (blue) on the Subwoofer flashes quickly.
- 3 Turn on the BLUETOOTH function on the BLUETOOTH device, search for devices and select "HT-RT4" or "HT-RT40".**

If a Passkey is required, enter "0000".

Perform this step within 5 minutes, otherwise pairing mode may be canceled.

- 4 Make sure that the BLUETOOTH indicator (blue) on the Subwoofer lights up.**

Connection is established.

Shēn

- Passkey may be called "Passcode", "PIN code", "PIN number" or "Password".
- You can pair up to 10 BLUETOOTH devices. If the 11th BLUETOOTH device is paired, the least recently connected device will be replaced by the new one.

Listening to music from the paired device

- 1 Turn on the BLUETOOTH function of the paired BLUETOOTH device.**

- 2 Press INPUT repeatedly to select "BT".**

The system automatically reconnects to the BLUETOOTH device it was most recently connected to.

When the BLUETOOTH connection is established, the BLUETOOTH indicator (blue) on the Subwoofer lights up.

- 3 Start playback on the BLUETOOTH device.**

- 4 Adjust the volume.**

- Adjust the BLUETOOTH device volume.
- Press  +/- to adjust the system volume.
- Press SW  +/- to adjust the Subwoofer volume.

Shēn

- Once the system and the BLUETOOTH device are connected, you can control playback by pressing **▶▶** and **◀◀/▶▶▶**.
- You can connect to the system from a paired BLUETOOTH device even when the system in standby mode, if you set the "BTSTB" to "ON" (page 19).
- The audio playback on this system may be delayed from that on the BLUETOOTH device because of the characteristics of the BLUETOOTH wireless technology.

Kēs

You can enable or disable codec AAC from BLUETOOTH device (page 19).

To disconnect the BLUETOOTH device

Perform any of the following items.

- Touch **⊗ PAIRING** on the Subwoofer again.
- Disable the BLUETOOTH function on the BLUETOOTH device.
- Turn off the system or the BLUETOOTH device.

Connecting to a mobile device by One-touch function (NFC)

NFC (Near Field Communication) is a technology enabling short-range wireless communication between various devices.

By holding an NFC-compatible mobile device such as a smartphone or tablet near the N-Mark on the Subwoofer, the system is turned on automatically, then pairing and BLUETOOTH connection are performed automatically.

Compatible mobile devices

Mobile devices with a built-in NFC function
(OS: Android 2.3.3 or later, excluding Android 3.x)

Shēn

- The system only can recognize and connect to one NFC-compatible mobile device at a time. If you try to connect another NFC-compatible mobile device to the system, the currently connected NFC-compatible mobile device will be disconnected.
- Depending on your mobile device, you may need to perform the following items on your mobile device in advance.
 - Turn on the NFC function. For details, refer to the operating instructions of the mobile device.
 - If your mobile device is having an older OS version than Android 4.1.x, download and start the "NFC Easy Connect" application. "NFC Easy Connect" is a free application for Android mobile devices that can be obtained from Google Play™. (The application may not be available in some countries/regions.)

- 1 Hold the mobile device near to the N-Mark on the Subwoofer until the mobile device vibrates.**

Follow the on-screen instructions displayed on the mobile device, and complete the procedure for BLUETOOTH connection. When the BLUETOOTH connection is established, the BLUETOOTH indicator (blue) on the Subwoofer lights up.

2 Start playback of audio source on the mobile device.

For details on playback operations, refer to the operating instructions of your mobile device.

3 Adjust the volume.

- Adjust the BLUETOOTH device volume.
- Press \triangleleft +/- to adjust the system volume.
- Press SW \triangleleft +/- to adjust the Subwoofer volume.

Kēs

If pairing and the BLUETOOTH connection fail, do the following.

- Hold the mobile device near to the N-Mark on the Subwoofer again.
- Remove the case from the mobile device if using a commercially available mobile device case.
- Relaunch "NFC Easy Connect" application.

To stop playback by One-touch function

Hold the mobile device near to the N-Mark on the Subwoofer again.

Controlling the system using a smartphone or tablet (Sony | Music Center)

Sony | Music Center is an application for controlling compatible Sony audio devices using the mobile device such as a smartphone or tablet.

For details about Sony | Music Center, refer to the following URL.

<http://www.sony.net/smcqa/>

Sony | Music Center allows you to:

- enjoy music at home seamlessly.
- change commonly used settings, select the input of the system, and adjust the volume.
- enjoy music content stored on a smartphone with the system.
- enjoy music visually with your smartphone display.

Shēnī

- Sony | Music Center uses the BLUETOOTH function of the system.
- What you can control with Sony | Music Center varies depending on the connected device. The specification and design of the application may change without notice.

Using Sony | Music Center

- 1 Download free Sony | Music Center app on the mobile device.
- 2 Connect the system and mobile device with the BLUETOOTH connection (page 15).
- 3 Start Sony | Music Center.
- 4 Operate by following the Sony | Music Center screen.

Use the latest version of Sony | Music Center.

Using the setup display

You can set the following items with the menu.

Your settings are retained even if you disconnect the AC power cord (mains lead).

- 1 Press **MENU** to turn on the menu in the front panel display.
- 2 Press **BACK**/**▲**/**▼**/**ENTER** repeatedly to select the item and press **ENTER** to select the setting you want.
- 3 Press **MENU** to turn off the menu.

Menu list

The default settings are underlined. They may differ depending on the area.

Menu items	Function
"LVL >" (Level)	"SUR.L"/"SUR.R" (Surround left/right speaker level) Shënim Be sure to set "TTONE" to "ON" for easy adjustment.
"ATT" (Attenuation settings – Analog)	Distortion may occur when you listen to a device connected to the ANALOG IN jack. You can prevent distortion by attenuating the input level on the system. • " <u>ON</u> ": Attenuates the input level. The output level will decrease at this setting. • " <u>OFF</u> ": Normal input level.
"DRC" (Dynamic range control)	Useful for enjoying movies at low sound volume. DRC applies to Dolby Digital sources. • " <u>ON</u> ": Compresses sound according to the information in the content. • " <u>OFF</u> ": Sound is not compressed.
"TTONE" (Test tone)	• " <u>ON</u> ": The test tone is output from each speaker in sequence. • " <u>OFF</u> ": Turns off the test tone.
"SPK >" (Speaker)	• " <u>STDRD</u> ": Select this setting if you install the Bar Speaker and the Surround Speakers in standard position. • " <u>FRONT</u> ": Select this setting if you install the Bar Speaker and the Surround Speakers in front.
"SUR.L"/"SUR.R" (Surround left/right speaker distance)	" <u>3.0M</u> ": Adjusts the distance from the seating position to the Surround Speakers from 1.0 meter to 6.0 meters.

Menu items	Function	
"AUD >" (Audio)	"DUAL" (Dual mono)	You can enjoy multiplex broadcast sound when the system receives a Dolby Digital multiplex broadcast signal. <ul style="list-style-type: none"> • "M/S": Mixed sound of both the main and sub languages will be output. • "MAIN": Sound of the main language will be output. • "SUB": Sound of the sub language will be output.
	"TV AU" (TV audio)	<ul style="list-style-type: none"> • "AUTO": Select this setting when the system is connected to an HDMI (ARC) jack of a TV with an HDMI cable. • "OPT": Select this setting when the system is connected to a TV with the optical digital cable.
	"EFCT" (Sound effect)	<ul style="list-style-type: none"> • "ON": The sound of the selected sound field is played. It is recommended to use this setting. • "OFF": The input source is down-mixed for 2 channels.
	"STRM" (Stream)	Shows the current audio stream information. See page 29 on the supported audio formats.
"HDMI->"	"CTRL" (Control for HDMI)	<ul style="list-style-type: none"> • "ON": The Control for HDMI function is enabled. Devices connected with an HDMI cable can control each other. • "OFF": Off.
	"TVSTB" (Standby Linked to TV)	This function is available when you set "CTRL" to "ON". <ul style="list-style-type: none"> • "AUTO": If the input of the system is "TV", the system turns off automatically when you turn off the TV. • "ON": The system turns off automatically when you turn off the TV regardless of the input. • "OFF": The system does not turn off when you turn off the TV.
	"COLOR" (HDMI color)	<ul style="list-style-type: none"> • "AUTO": Automatically detects the type of external device, and switches to the matching color setting. • "YCBCR": Outputs YCbCr video signals. • "RGB": Outputs RGB video signals.
"BT >" (BLUETOOTH)	"BTAAC" (BLUETOOTH Advanced audio coding)	You can set whether or not the system uses AAC via BLUETOOTH. <ul style="list-style-type: none"> • "ON": Enable AAC codec. • "OFF": Disable AAC codec. <p>Shēn</p> <p>If you change the "BTAAC" setting when a BLUETOOTH device is connected, the codec setting is only reflected after the next connection.</p>
	"BTSTB" (BLUETOOTH standby)	This function is available when the system has pairing information. The system is in BLUETOOTH standby mode even when it is turned off. <ul style="list-style-type: none"> • "ON": BLUETOOTH standby mode is enabled. • "OFF": BLUETOOTH standby mode is disabled.
	"INFO" (BLUETOOTH device information)	The detected BLUETOOTH device name and address appear in the front panel display. "NO DEVICE" appears if the system is not connected to a BLUETOOTH device.

Menu items		Function
"USB >"	"REPT" (Play mode)	<ul style="list-style-type: none"> • "NONE": Plays back all tracks. • "ONE": Repeats one track. • "FLDER": Repeats all tracks in a folder. • "RANDM": Repeats all tracks in a folder in random order. • "ALL": Repeats all tracks.
"SYS >" (System)	"ASTBY" (Auto standby)	<ul style="list-style-type: none"> • "ON": Turns on the auto standby function. When you do not operate the system for about 20 minutes, the system enters standby mode automatically. • "OFF": Off.
	"VER" (Version)	The current firmware version information appears in the front panel display.

Other Functions

Using the Control for HDMI function

Connecting a device such as a TV or Blu-ray Disc player compatible with the Control for HDMI function* by HDMI cable (High Speed HDMI Cable, supplied only for certain areas) enables you to easily operate the device by a TV remote control.

The following functions can be used with the Control for HDMI function.

- System Power Off function
- System Audio Control function
- Audio Return Channel (ARC)
- One-Touch Play function

* Control for HDMI is a standard used by CEC (Consumer Electronics Control) for allowing HDMI (High-Definition Multimedia Interface) devices to control each other.

Shēnī

These functions may work with devices other than those manufactured by Sony, but operation is not guaranteed.

Preparing to use the Control for HDMI function

Set "HDMI>" – "CTRL" on the system to "ON" (page 19). The default setting is "ON".

Enable the Control for HDMI function settings for the TV and other device connected to the system.

Kēs

If you enable the Control for HDMI ("BRAVIA" sync) function when using a TV manufactured by Sony, the Control for HDMI function of the system is also enabled automatically. When settings are completed, "DONE" appears in the front panel display.

System Power Off function

When you turn off the TV, the system will turn off automatically.

Set "HDMI>" – "TVSTB" on the system to "ON" or "AUTO" (page 19). The default setting is "AUTO".

System Audio Control function

If you turn on the system while you are watching the TV, the TV sound will be output from the speakers of the system. The volume of the system can be adjusted using the TV's remote control. If the TV sound was output from the speakers of the system the previous time you watched the TV, the system will be turned on automatically when you turn on the TV again. Operations can also be made by the TV's menu. For details, refer to the operating instructions of your TV.

Shēnī

- Sound is only output from the TV if other than "TV" input is selected when using the Twin Picture function on the TV. When you disable the Twin Picture function, the sound is output from the system.
- The number for the system's volume level is displayed on the TV screen depending on the TV. The volume number displayed on the TV may differ from the number on the front panel display of the system.

- Depending on the settings of the TV, the System Audio Control function may not be available. For details, refer to the operating instructions of your TV.

Audio Return Channel (ARC)

If the system is connected to a TV's HDMI IN jack compatible with Audio Return Channel, you can listen to TV sound from the speakers of the system without connecting an optical digital cable.

On the system, set "AUD >" – "TV AU" to "AUTO" (page 19). The default setting is "AUTO".

Shēn

If the TV is not compatible with Audio Return Channel, an optical digital cable needs to be connected (Refer to the supplied Startup Guide).

One-Touch Play function

When you play content on a device (Blu-ray Disc player, "PlayStation®4", etc.) connected to the TV, the system and TV are turned on automatically, the input of the system is switched to the input for the TV, and sound is output from the speakers of the system.

Shēn

- If the TV sound was output from the speakers of the TV the previous time you watched the TV, the system does not turn on and the sound and picture are output from the TV even if device content is played.
- Depending on the TV, the beginning part of content being played may not play correctly.

Using the "BRAVIA" Sync function

In addition to the Control for HDMI function, you can also use the following function on devices compatible with the "BRAVIA" sync function.

- Scene Select function

Shēn

This function is proprietary function of Sony. This function cannot operate with products other than those manufactured by Sony.

Scene Select function

The sound field of the system is automatically switched according to the TV's Scene Select or Sound Mode function settings. For details, refer to the operating instructions of your TV. Set the sound field to "CLEARAUDIO+" (page 14).

Notes on HDMI connections

- Use a High Speed HDMI cable. If you use a Standard HDMI cable, 1080p content may not be displayed properly.
- Use an HDMI-authorized cable.
- Use a Sony High Speed HDMI cable with the Cable Type Logo.
- We do not recommend using an HDMI-DVI conversion cable.
- Check the setup of the connected device if an image is poor or the sound does not come out of the device connected via the HDMI cable.
- Audio signals (sampling frequency, bit length, etc.) transmitted from an HDMI jack may be suppressed by the connected device.

- Sound may be interrupted when the sampling frequency or the number of channels of audio output signals from the playback device is switched.
- If the connected device is not compatible with copyright-protection technology (HDCP), the image and/or the sound from the HDMI OUT jack of this system may be distorted or may not be output. In such a case, check the specifications of the connected device.

Saving power in standby mode

Check that you have made the following settings:

- "CTRL" in "HDMI>" is set to "OFF" (page 19).
- "BTSTB" in "BT >" is set to "OFF" (page 19).

Additional Information

Precautions

On safety

- Should any solid object or liquid fall into the system, unplug the system and have it checked by qualified personnel before operating it any further.
- Do not touch the AC power cord (mains lead) with wet hands. Doing so may cause an electric shock.
- Do not climb on the Bar Speaker, Subwoofer and Surround Speakers as you may fall down and injure yourself, or system damage may result.

On power sources

- Before operating the system, check that the operating voltage is identical to your local power supply. The operating voltage is indicated on the nameplate at the rear of the Subwoofer.
- If you are not going to use the system for a long time, be sure to disconnect the system from the wall outlet (mains). To disconnect the AC power cord (mains lead), grasp the plug itself; never pull the cord.
- AC power cord (mains lead) must be changed only at a qualified service shop.

On heat buildup

Although the system heats up during operation, this is not a malfunction. If you continuously use this system at high volume, the system temperature rises considerably. To avoid burning yourself, do not touch the system.

On placement

- Place the system in a location with adequate ventilation to prevent heat buildup and prolong the life of the system.

- Do not place the system near heat sources or in a place subject to direct sunlight, excessive dust, or mechanical shock.
- Do not place the Bar Speaker, Subwoofer and Surround Speakers on a soft surface (rugs, blankets, etc.) or place anything at the rear of the Bar Speaker, Subwoofer and Surround Speakers that might block the ventilation holes and cause malfunctions.
- If the system is being used in combination with a TV, VCR, or tape deck, noise may result and picture quality may be affected. In this case, place the system away from the TV, VCR, or tape deck.
- Use caution when placing the system on a surface that has been specially treated (with wax, oil, polish, etc.), as staining or discoloration of the surface may result.
- Take care to avoid any possible injury from the corners of the Bar Speaker, Subwoofer and Surround Speakers.
- Keep 3 cm or more space under the Bar Speaker and Surround Speakers when you hang it on a wall.

On operation

Before connecting other device, be sure to turn off and unplug the system.

If you encounter color irregularity on a nearby TV screen

Color irregularities may be observed on certain types of TV.

- If color irregularity is observed...
Turn off the TV, then turn it on again after 15 to 30 minutes.
- If color irregularity is observed again...
Place the system further away from the TV.

On cleaning

Clean the system with a soft, dry cloth. Do not use any type of abrasive pad, scouring powder, or solvent such as alcohol or benzine.

If you have any question or problem concerning your system, please consult your nearest Sony dealer.

On handling the Subwoofer

Do not place your hand into the slit of the Subwoofer when lifting it. The speaker driver may be damaged. When lifting it, hold the bottom of the Subwoofer.

Troubleshooting

If you experience any of the following difficulties while using the system, use this troubleshooting guide to help remedy the problem before requesting repairs. Should any problem persist, consult your nearest Sony dealer.

General

The power does not turn on.

- Make sure the AC power cord (mains lead) is connected securely.

The system does not work normally.

- Disconnect the AC power cord (mains lead) from the wall outlet (mains), then reconnect after several minutes.

The system is turned off automatically.

- The auto standby function is working. Set "ASTBY" in "SYS >" to "OFF" (page 20).

The system does not turn on even when the TV is turned on.

- Set "HDMI>" - "CTRL" to "ON" (page 19). The TV must support the Control for HDMI function (page 21). For details, refer to the operating instructions of your TV.
- Check the speaker settings of the TV. The system power syncs with the speaker settings of the TV. For details, refer to the operating instructions of your TV.

- If the sound was output from the speakers of the TV the previous time, the system does not turn on even when the TV is turned on. Turn on the system and switch the input of the system to "TV" (page 12).

The system turns off when the TV is turned off.

- Check the setting of "HDMI>" - "TVSTB" (page 19). When "TVSTB" is set to "ON", the system turns off automatically when you turn off the TV regardless of the input.

The system does not turn off even when the TV is turned off.

- Check the setting of "HDMI>" - "TVSTB" (page 19). To turn off the system automatically regardless of the input when you turn off the TV, set "TVSTB" to "ON". The TV must support the Control for HDMI function (page 21). For details, refer to the operating instructions of your TV.

Sound

No TV sound is output from the system.

- Check the type and connection of the HDMI cable, optical digital cable, or analog audio cable that is connected to the system and the TV (refer to the supplied Startup Guide).
- When the system is connected with a TV compatible with Audio Return Channel, make sure the system is connected to an HDMI (ARC) jack of a TV (refer to the supplied Startup Guide). If sound is still not output or if sound is interrupted, connect the optical digital cable (supplied only for certain areas) and set "AUD >" - "TV AU" to "OPT" (page 19).

- If your TV is not compatible with Audio Return Channel, TV sound will not be output from the system even if the system is connected to the TV's HDMI input jack. To output TV sound from the system, connect the optical digital cable (supplied only for certain areas) (refer to the supplied Startup Guide).

- If sound is not output from the system even if the system and TV are connected by optical digital cable or if the TV does not have an optical digital sound output jack, connect an analog audio cable (not supplied) and switch input of the system to "ANALOG" (page 12).
- Switch input of the system to "TV" (page 12).
- Increase the volume on the system or cancel muting.
- Depending on the order in which you connect the TV and the system, the system may be muted and "MUTING" is displayed in the front panel display of the system. If this happens, turn on the TV first, then the system.
- Set the speakers setting of the TV (BRAVIA) to Audio System. Refer to the operating instructions of your TV on how to set the TV.
- Depending on the TV and the playback sources, sound may not be output from the system. Set the audio format setting of the TV to "PCM". For details, refer to the operating instructions of your TV.

The sound is output from both the system and the TV.

- Mute the sound of the system or the TV.

No sound or only a very low-level sound is heard from the Subwoofer.

- Make sure the AC power cord (mains lead) of the Subwoofer is connected properly (refer to the supplied Startup Guide).
- Press SW \triangleleft + to increase the Subwoofer volume (pages 9, 14).
- A Subwoofer is for reproducing bass sound. If the input sources contain very little bass sound components (i.e., a TV broadcast), the sound from the Subwoofer may be difficult to hear.
- When you play content compatible with copyright protection technology (HDCP), it is not output from the Subwoofer.

No sound or only a very low-level sound of the device connected to the system is heard.

- Press \triangleleft + to increase the volume level (page 9).
- Press MUTE or \triangleleft + to cancel the muting function (page 9).
- Make sure the input source is selected correctly. You should try other input sources by pressing INPUT repeatedly (page 12).
- Check that all the cables and cords of the system and the connected device are firmly inserted.
- Depending on the audio format, sound may not be output. Make sure that the audio format is compatible with the system (page 29).

No sound or only very low-level sound is heard from the Surround Speakers.

- Make sure cable of the Surround Speakers is connected properly to the Subwoofer (refer to the supplied Startup Guide).

- Multi-channel sound which has not been recorded as surround sound is not output from the Surround Speakers.
- If you want to output 2-channel sound from the Surround Speakers, press the CLEARAUDIO+ and set the sound field setting to "CLEARAUDIO+".
- Depending on the sound source, the sound from the Surround Speakers may have been recorded with a soft sound effect.

The surround effect cannot be obtained.

- Depending on the input signal and the sound field setting, surround sound processing may not work effectively. The surround effect may be subtle, depending on the program or disc.
- To play multi-channel audio, check the digital audio output setting on the device connected to the system. For details, refer to the operating instructions supplied with the connected device.

USB device

The USB device is not recognized.

- Try the following:
 - ① Turn off the system.
 - ② Remove and reconnect the USB device.
 - ③ Turn on the system.
- Make sure that the USB device is securely connected to the ψ (USB) port.
- Check if the USB device or a cable is damaged.
- Check if the USB device is on.
- If the USB device is connected via a USB hub, disconnect it and connect the USB device directly to the Subwoofer.

BLUETOOTH device

BLUETOOTH connection cannot be established.

- Check that the BLUETOOTH indicator (blue) on the Subwoofer lights up (page 8).
- Make sure the BLUETOOTH device to be connected is turned on and the BLUETOOTH function is enabled.
- Move the BLUETOOTH device closer to the Subwoofer.
- Pair this system and the BLUETOOTH device again. You may need to cancel the pairing with this system using your BLUETOOTH device first.

Pairing cannot be done.

- Move the BLUETOOTH device closer to the Subwoofer.
- Make sure this system is not receiving interference from a wireless LAN device, other 2.4 GHz wireless devices, or a microwave oven. If a device that generates electromagnetic radiation is nearby, move the device away from this system.
- Pairing may not be possible if other BLUETOOTH devices are present around the system. In this case, turn off the other BLUETOOTH devices.

No sound is output from the connected BLUETOOTH device.

- Check that the BLUETOOTH indicator (blue) on the Subwoofer lights up (page 8).
- Move the BLUETOOTH device closer to the Subwoofer.
- If a device that generates electromagnetic radiation, such as a wireless LAN device, other BLUETOOTH devices, or a microwave oven is nearby, move the device away from this system.

- Remove any obstacle between this system and the BLUETOOTH device or move this system away from the obstacle.
- Reposition the connected BLUETOOTH device.
- Switch the wireless LAN frequency of any nearby Wi-Fi router or PC to 5 GHz range.
- Increase the volume on the connected BLUETOOTH device.

The sound is not in sync with the image.

- When you are watching movies, you may hear the sound with a slight delay from the image.

Remote control

The remote control does not function.

- Point the remote control to the remote control sensor on the Subwoofer (pages 7, 12).
- Remove any obstacles in the path between the remote control and the Subwoofer.
- Replace both batteries in the remote control with new ones, if they are weak.
- Make sure you are pressing the correct button on the remote control.

The TV remote control does not work.

- Install the system so that it does not obstruct the remote control sensor of the TV.

Others

The Control for HDMI function does not work properly.

- Check the connection with the system (refer to the supplied Startup Guide).

- Enable the Control for HDMI function on the TV. For details, refer to the operating instructions of your TV.
- Wait a while, and then try again. If you unplug the system, it will take a while before operations can be made. Wait for 15 seconds or longer, and then try again.
- Make sure the devices connected to the system support the Control for HDMI function.
- Enable the Control for HDMI function on the devices connected to the system. For details, refer to the operating instructions of your device.
- The type and number of devices that can be controlled by the Control for HDMI function is restricted by the HDMI CEC standard as follows:
 - Recording devices (Blu-ray Disc recorder, DVD recorder, etc.): up to 3 devices
 - Playback devices (Blu-ray Disc Player, DVD player, etc.): up to 3 devices
 - Tuner-related devices: up to 4 devices
 - Audio system (receiver/headphone): up to 1 device (used by this system)

If "PRTCT" appears in the front panel display of the Subwoofer.

- Press  to turn off the system. After the display turns off, disconnect the AC power cord (mains lead) then check that nothing is blocking the ventilation holes of the Subwoofer.

The front panel display of the Subwoofer is not lit.

- Press DIMMER to set the brightness to "BRIGHT" or "DARK", if set to "OFF" (page 9).

Sensors of the TV do not work properly.

- The system may block some sensors (such as the brightness sensor), the remote control receiver of your TV, or the emitter for 3D glasses (infrared transmission) of a 3D TV that supports the infrared 3D glass system or the wireless communication. Move the system away from the TV within a range that allow those parts to operate properly. For the locations of the sensors and remote control receiver, refer to the operating instructions supplied with the TV.

The system does not work properly.

- The system may be in demo mode. To cancel demo mode, reset the system (page 28).

Reset

If the system still does not operate properly, reset the system as follows. Be sure to use the touch keys on the Subwoofer to perform this operation.

- 1 Hold down INPUT, touch VOL - and  simultaneously for 5 seconds.**
"RESET" appears in the front panel display, and the settings of the menu and sound fields, etc. return to their initial status.
- 2 Disconnect the AC power cord (mains lead).**
- 3 Reconnect the AC power cord (mains lead), then touch  to turn on the system.**

Playable types of files

Music

Codec	Extension
MP3 (MPEG-1 Audio Layer III)	.mp3
AAC	.m4a, .mp4, .3gp
WMA9 Standard	.wma
LPCM	.wav

Video*

Codec	Extension
Xvid	.avi
MPEG4	.avi, .mp4, .3gp

* HT-RT40 only

Shen

- Some files may not play depending on the file format, the file encoding, or the recording condition.
- Some files edited on a PC may not play.
- The system does not play coded files such as DRM and Lossless.
- The system can recognize the following files or folders in USB devices:
 - up to 200 folders (including root folder)
 - folder paths up to 128 characters long
 - up to 200 files/folders in a single layer
- Some USB devices may not work with this system.
- The system can recognize Mass Storage Class (MSC) devices.

Supported audio formats

Audio formats supported by this system are as follows.

- Dolby Digital
- DTS*
- LPCM 2ch
- AAC

* HT-RT4 only

On BLUETOOTH communication

Supported BLUETOOTH version and profiles

Profile refers to a standard set of functions for various BLUETOOTH product features. See "BLUETOOTH section" in "Specifications" (page 29) for the BLUETOOTH version and profiles supported by this system.

Effective communication range

BLUETOOTH devices should be used within approximately 10 meters (unobstructed distance) of each other. The effective communication range may become shorter under the following conditions.

- When a person, metal object, wall or other obstruction is between the devices with a BLUETOOTH connection.
- Locations where a wireless LAN is installed.
- Around microwave ovens that are in use.
- Locations where other electromagnetic waves are generated.

Effects of other devices

BLUETOOTH devices and wireless LAN (IEEE 802.11b/g/n) use the same frequency band (2.4 GHz). When you use BLUETOOTH device near a device with wireless LAN capability, electromagnetic interference may occur. This could result in lower data transfer rates, noise, or inability to connect. If this happens, try the following remedies:

- Use this system at least 10 meters away from the wireless LAN device.
- Turn off the power to the wireless LAN device when you use BLUETOOTH device within 10 meters.
- Install this system and BLUETOOTH device as close to each other as possible.

Effects on other devices

The radio waves broadcast by this system may interfere with the operation of some medical devices. Since this interference may result in malfunction, always turn off the power on this system and BLUETOOTH device in the following locations:

- In hospitals, on trains, in airplanes, at gas stations, and any place where flammable gasses may be present.
- Near automatic doors or fire alarms.

Shēn

- This system supports security functions that comply with the BLUETOOTH specification to ensure secure connection during communication using BLUETOOTH technology. However, this security may be insufficient depending on the setting contents and other factors, so always be careful when performing communication using BLUETOOTH technology.
- Sony cannot be held liable in any way for damages or other loss resulting from information leaks during communication using BLUETOOTH technology.
- BLUETOOTH communication is not necessarily guaranteed with all BLUETOOTH devices that have the same profile as this system.
- BLUETOOTH devices connected with this system must comply with the BLUETOOTH specification prescribed by the Bluetooth SIG, Inc., and must be certified to comply. However, even when a device complies with the BLUETOOTH specification, there may be cases where the characteristics or specifications of the BLUETOOTH device make it impossible to connect, or may result in different control methods, display or operation.
- Noise may occur or the audio may cut off depending on the BLUETOOTH device connected with this system, the communications environment, or surrounding conditions.
